MANUAL BOOK UTS PEMROGRAMAN KOMPUTER2

Nama :Saeful Imam Gunawan

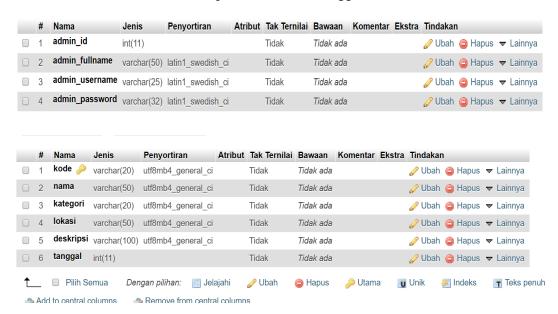

NIM :18090039

Kelas :4A

MANUAL BOOK ARSIP DOKUMEN

1. Pertama kita membuat database

- Nyalakan xampp dan apache lalu jalankan
- Lalu kita membuat data base dengan nama dokumen
- Didalam database dokumen kita buat 2 tabel yaitu tbl_admin dan tbl_dokumen
- Isikan tbl_admin dengan : admin_id (int 11) dan dijadikan sebagai pk, admin_fullname varchar(50), admin_username(varchar(25), admin_password varchar(32)
- Isikan tbl_dokumen dengan : kode (varchar 20), nama varchar(50), kategori varchar(20), lokasi varchar(50), deskripsi varchart(100) tanggal date

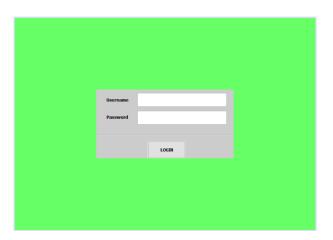

2. Membuat projek

- Klik menu file new projek, lalu akan terbuka dialog new projek
- Pilih java untuk jenis projects lalu java applications klik next
- Isikan nama projek name "dokumen"
- Dalam projek dokumen kita buat package dengan nama "apps"

Membuat kelas

- Membuat kelas login
 - i. Desain kelas login

```
J_label = username

j_label = password

jtextfield=txtusername

jpasswordfield=txtpassword

jseparator

jpanel
```

ii. Edit kode program seperti dibawah ini

```
package Apps;import java.awt.Frame;
import java.awt.HeadlessException;
import java.security.MessageDigest;
import java.security.NoSuchAlgorithmException;
import java.sql.Connection;
import java.sql.ResultSet;
import java.sql.SQLException;
import java.sql.Statement;
import javax.swing.JOptionPane;

public void run() {
    Login login = new Login();
    login.setExtendedState(Frame.MAXIMIZED_BOTH);
    login.setVisible(true);
}
```

```
private void Login() {
   String user = txtusername.getText();
   char[] pass = txtpassword.getPassword();
   if(user.isEmpty()){
       JOptionPane.showMessageDialog(this, "Username Harus Diisi");
       txtusername.requestFocus();
   }else if (pass.length == 0) {
       JOptionPane.showMessageDialog(this, "Password Harus Diisi");
       txtpassword.requestFocus();
   }else {
       String password = new String(pass);
       btnlogin.setEnabled(false);
           Connection c = konfig.configDB();
           Statement st = c.createStatement();
           String q = "SELECT * FROM tb_admin "
+ "WHERE admin_username='"+user+" ' "
                    + "AND admin_password=MD5('"+password+"')";
           ResultSet rs = st.executeQuery(q);
           if (rs.next()) {
   dokumen h = new dokumen();
               h.setVisible(true);
               this.dispose();
               JOptionPane.showMessageDialog(this, "Username/Password Salah !");
               txtusername.requestFocus();
           btnlogin.setEnabled(true);
       } catch (HeadlessException | SQLException e) {
           JOptionPane.showMessageDialog(this, e.getMessage());
```

- Membuat kelas konfig dalam package apps
 - I. Edit kode program seperti dibawah package Apps;

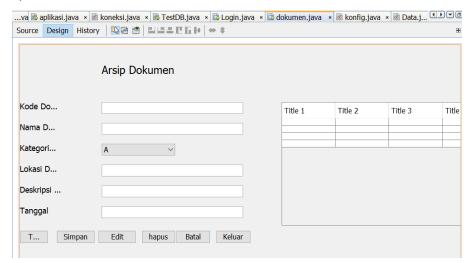

```
import java.sql.Connection;
import java.sql.DriverManager;
import java.sql.SQLException;
public class konfig {
    private static Connection MySQLConfig;

    public static Connection configDB () throws SQLException{
        try {
            String url = "jdbc:mysql://localhost:3306/dokumen";
            String user = "root";
            String pass = "";

            DriverManager.registerDriver(new com.mysql.jdbc.Driver());
            MySQLConfig = DriverManager.getConnection(url , user , pass);

        } catch (Exception e) {
            System.out.println("Koneksi Ke Database Gagal"+e.getMessage());
        }
        return MySQLConfig;
    }
}
```

- Membuat kelas dokumen dalam package apps
 - 1) Desain kelas dokumen

Jlabel=arsip dokumen jlabel=kode dokumen jlabel=kategori jlabel=lokasi dokumen jlabel=deskripsi dokumen jlabel=tanggal

Jtextfield =txtkodedokumen Jtextfield =txtnamadokumen jcombobox=cmbkategoridokumen Jtextfield =txtlokasidokumen Jtextfield =txtdeskripsidokumen Jtextfield =txttanggaldokumen jtextfield=txtcari

Jbutton=tambah=btn_stambah Jbutton=simpan=btn_simpan Jbutton=Edit=btn_Edit Jbutton=Hapus=btn_Hapus Jbutton=Batal=btn_Batal Jbutton=Keluar=btn_keluar

Jtable=table_dokumen

Edit kode program seperti dibawah package Apps;

import java.awt.HeadlessException; import java.sql.Connection; import java.sql.SQLException; import javax.swing.JOptionPane;

```
import javax.swing.table.DefaultTableModel;
public class dokumen extends javax.swing.JFrame {
  private void kosongkan from() {
    txtkodedokumen.setEditable(true);
    txtkodedokumen.setText(null);
    txtnamadokumen.setText(null);
    cmbkatagoridokumen.setSelectedItem(this);
    txtlokasi.setText(null);
    txtdeskripsi.setText(null);
    txttanggal.setText(null);
  }
  private void tampilkan_data() {
    DefaultTableModel model = new DefaultTableModel();
    model.addColumn("No.");
    model.addColumn("Kode Dokumen");
    model.addColumn("Nama Dokumen");
    model.addColumn("Kategori Dokumen");
    model.addColumn("Lokasi Dokumen");
    model.addColumn("Deskripsi Dokumen");
    model.addColumn("Tanggal");
    String cari= txtcari.getText();
    try {
       int no = 1;
       String sql = "SELECT *FROM tb_dokumen WHERE nama LIKE
'%"+cari+"%'";
       java.sql.Connection conn = (Connection)konfig.configDB();
       java.sql.Statement stm = conn.createStatement();
       java.sql.ResultSet res = stm.executeQuery(sql);
       while (res.next()) {
         model.addRow(new Object[]{no++,res.getString(1),
res.getString(2),res.getString(3),res.getString(4),res.getString(5),res.getString(6)}
);
       }
       tabledokumen.setModel(model);
     } catch (Exception e) {
       System.out.println("Error : "+e.getMessage());
     }
  }
  public dokumen() {
    initComponents();
    tampilkan_data();
```

```
kosongkan_from();
}
```

```
private void btnSiimpanActionPerformed(java.awt.event.ActionEvent evt) {
             String sql = "INSERT INTO tb_dokumen VALUES ('"+txtkodedokumen.getText()+
             String sql - INSERT INTO to document values ( **TALAGUSGAGAMENI,9STSAC(),"
"',""+txtnamadokumen.getText()+"',""+txtdescridokumen.getSelectedItem()
+"',""+txtlokasi.getText()+"',""+txtdeskripsi.getText()+"',""+txttanggal.getText()+"')";
java.sql.Connection conn = (Connection)konfig.configDB();
             java.sql.PreparedStatement pstm = conn.prepareStatement(sql);
             pstm.execute();
             JOptionPane.showMessageDialog(null, "Proses simpan Data berhasil");
             tampilkan_data();
             kosongkan_from();
         } catch (HeadlessException | SQLException e) {
             JOptionPane.showMessageDialog(this, e.getMessage());
private void tabledokumenMouseClicked(java.awt.event.MouseEvent evt) {
         int baris = tabledokumen.rowAtPoint(evt.getPoint());
         String nik = tabledokumen.getValueAt(baris, 1).toString();
         txtkodedokumen.setText(nik);
         String nama = tabledokumen.getValueAt(baris, 2).toString();
         txtnamadokumen.setText(nama);
         String jab = tabledokumen.getValueAt(baris, 3).toString();
         cmbkatagoridokumen.setSelectedItem(jab):
         String alamat = tabledokumen.getValueAt(baris, 4).toString();
         txtlokasi.setText(alamat);
         String email = tabledokumen.getValueAt(baris, 5).toString();
         txtdeskripsi.setText(email);
```

```
String telp = tabledokumen.getValueAt(baris, 6).toString();
       txttanggal.setText(telp);
private void btnEditActionPerformed(java.awt.event.ActionEvent evt) {
          String sql = "UPDATE tb_dokumen SET kode = '"+
      java.sql.PreparedStatement pstm = conn.prepareStatement(sql);
          JOptionPane.showMessageDialog(null, "Edit Data Berhasil");
       } catch (HeadlessException | SQLException e) {
   JOptionPane.showMessageDialog(this, e.getMessage());
       kosongkan from();
private void btnHapusActionPerformed(java.awt.event.ActionEvent evt) {
          java.sql.Connection conn = (Connection)konfiq.confiqDB();
          java.sql.PreparedStatement pstm = conn.prepareStatement(sql);
          pstm.execute();
       JOptionPane.showMessageDialog(null, "Hapus Data Berhasil");
} catch (HeadlessException | SQLException e) {
          JOptionPane.showMessageDialog(this, e.getMessage());
